

Cieszyński tramwaj
Těšínská tramvaj
Teschener Straßenbahn
Teschen tram

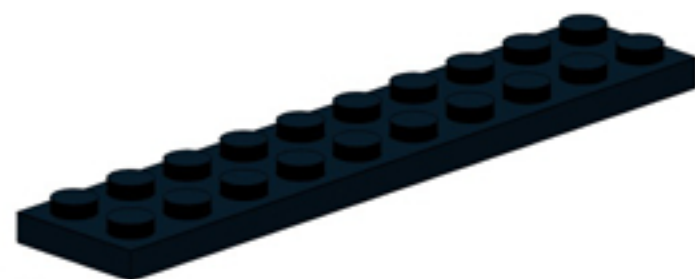

Linia tramwaju elektrycznego w Cieszynie uruchomiona została 12 lutego 1911 roku i łączyła historyczne centrum miasta z dworcem kolejowym położonym za rzeką Olzą. Tabor składał się z czterech wagonów silnikowych produkcji zakładów Ringhoffer w Pradze. Każdy wagon miał 8100 mm długości, 2050 mm szerokości, 3250 mm wysokości i ważył 10800 kg. Linia była wąskotorowa (rozstaw 1 metra) i miała łączną długość 1793 metrów. Po upadku Austro-Węgier i podziale miasta na część polską i czechosłowacką linię tramwajową zlikwidowano 2 kwietnia 1921 roku.

Pomysł i projekt modelu: Maciej Dembiniok © 2015
